

The Three Broaches

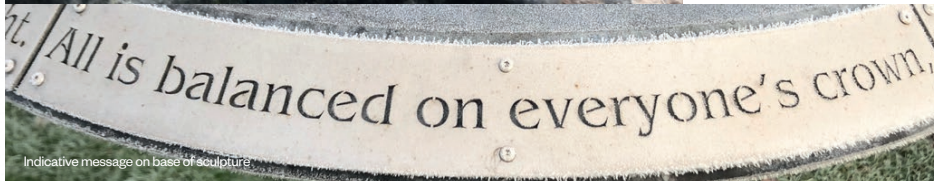

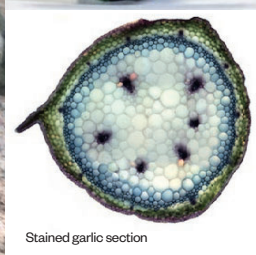

Broach is an old spelling of brooch: Boudicca, Queen of the Iceni tribe, wore one into battle. The Roman Canonium Pendant, discovered at Kelvedon, takes the shape of a broach and inspired this design, consisting of three round metal sculptures.

The 'Alder Broach' celebrates trees and water, the 'Map Broach' lays out a plan of the town and the 'Seed of Life Broach' represents the fertility of the land. These three broaches will be 8 feet tall and you can walk amongst them.

Metal components showing The Flowers of Life as branches.
